Product description:

The SmartBlinds Push controls one blind or roller shutter, or automatically set shutter position in response to a specified condition or event. Blind and roller shutter motor have to be equipped with an end position switch.
The SmartBlinds Push can be controlled by the ELKO Smart-App through the ELKO SmartHUB, wirelessly through room control or by manually pressing the device. You can also connect any number of mechanical push-buttons.
Functions:
Protection of the motor against damage with two mutually electrically locked relay contacts
Operating with extension units (mechanical double push-buttons)
Pairing to other devices (without gateway ELKO SmartHUB)
Using the ELKO Smart App, you can use additional functions, e.g.:
Setting a timer or a time schedule
Setting the blind position based on sunset/sunrise and outdoor weather
Varying blind and slat position.
