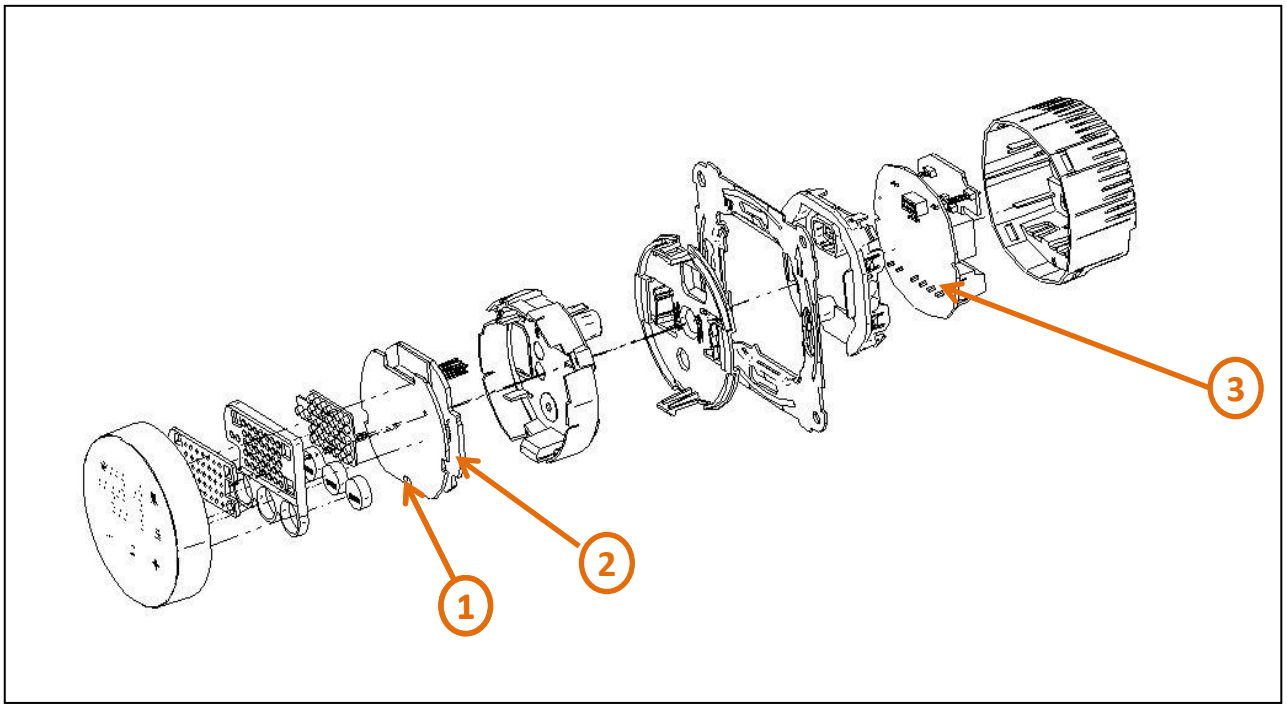
Product End of Life Instructions

Elko One Matter Thermostat 16A Pure White

End of Life Instructions



Recommendation	Number on drawing	Component / Material	Weight (in g)	Comment
To be depolluted	1	Electronic Board (Communication) > 10cm²	5.92	Including all soldering parts
To be depolluted	2	Electronic Board (Communication) > 10cm²	9.07	Including all soldering parts
To be depolluted	3	Electronic Board (Communication) > 10cm²	34.81	Including all soldering parts

Product description

Manufacturer identification	ELKO AS
Brand name	ELKO
Product function	The ELKO One Matter thermostat will provide you with a simple, easy to use product to control your heating system and save energy and money. It can be used either connected or non-connected for ease of use. As a connected device when commissioned to a Matter ecosystem, by scanning the QR code provided with your device, the thermostat will also be connected into your home network allowing your entire family to remotely control and automate home settings through their existing voice assistant or app.
Product reference	EKO50107
Total representative product mass	146 g
Representative product dimensions	115 mm x 115 mm x 70 mm
Accessories	No
Date of information release	04-2024

Additional information

Legal information	This product family is in the scope of European Union directive 2012/19/EU on Waste Electrical and Electronic Equipment (WEEE). The product family must be disposed according to the legislation of the country. This document is intended for use by end of life recyclers or treatment facilities. It provides the basic information to assure an appropriate end of life treatment for the components and materials of the product.	
In case of special transportation: transportation method	No	
Recyclability potential	**43%**	Recyclability rate has been calculated based on REEECY'LAB tool developed by Ecosystem, for components/materials not covered by the tool, data from the “ECO’DEEE recyclability and recoverability calculation method” was taken. If no data was found a conservative assumption was used (0% recyclability).
